

MD TANVEER MAHMOOD SHANIN

01628385867 shaninmahmood@gmail.com linkedin.com/in/md-tanveer-mahmood-shanin github.com/ShaninX48

Summary

CSE graduate with hands-on experience building full-stack and blockchain-based applications. Led a final-year capstone project on a decentralized voting system and contributed to award-winning team projects at KAIST WFK and WICE. Skilled in JavaScript, Node.js, Solidity, and modern web technologies with an interest in practical, shippable engineering.

Experience

Intern — Vibe Coding **July 2026** *KAIST WFK IT Online Training Program*

- Completed an internship through the KAIST WFK IT Online Training Program, focused on vibe coding.

Academic Project Lead **2025 – 2026** *Blockchain-Based Decentralized Voting System*

- Led the team as academic project lead in building a blockchain-based decentralized voting system as the final-year capstone project.

Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS, SQL

Backend / Real-Time: Node.js, Express.js, Socket.IO, Render

Databases & Platforms: Supabase, PostgreSQL, SQLite

AI / ML: Gemini API

Blockchain: Solidity, Polygon

Tools: Git, GitHub, Vercel

Projects

Blockchain-Based Decentralized Voting System | *Blockchain, Solidity* 2025 – 2026

- Led the team as academic project lead in designing and building a blockchain-based decentralized voting system as the final-year capstone project.
- Owned the project from architecture and smart contract design through implementation and presentation.

Sarangsho — AI Article Summarizer & Bookmarking Tool | *Gemini API, JavaScript, HTML/CSS* 2026

- Built a fully static, single-file web app that summarizes articles and lets users save and organize bookmarks.
- Integrated the Gemini API directly client-side for on-demand AI summarization with no backend dependency.

Yutnori Online — Real-Time Multiplayer Board Game | *Node.js, Express, Socket.IO, JavaScript* 2026

- Built a real-time online multiplayer version of the Korean board game Yutnori with a room/lobby system, full rule engine, and a solo AI opponent mode.
- Collaborated with a 3-person team and deployed the game live on Render.

Silent SOS (Porch Light) — Safety Check-In App | *JavaScript, Supabase* 2026

- Built a discreet safety check-in app: a timer-based check-in that auto-alerts a chosen contact if the user doesn't confirm safe arrival during a commute.
- Built as a 3-person team project with a Supabase Realtime backend, delivered with demo video, deck, and live deployment as a course requirement.

Awards

Excellence Award 2026

2026 WFK IT Online Training Program, Final Project Competition (KAIST/UITs/NIA)

Bronze Award — Find Blood 2025

WICE

Education

B.Sc. in Computer Science & Engineering (Honours) 2022 – 2026

University of Information Technology and Sciences (UITs) — CGPA: 2.81 / 4.00, final year project result pending

HSC (Higher Secondary Certificate) 2021

Birshrestho Munshi Abdur Rouf Public College, Science — GPA: 4.92 / 5.00

SSC (Secondary School Certificate) 2019

Motijheel Ideal School & College, Science — GPA: 5.00 / 5.00
