OBJECTIVE

Junior full-stack developer (JavaScript, TypeScript, Node.js) with hands-on experience building real-time web apps and blockchain applications. Led a 3-person team to 2nd place at KAIST WFK and led a final-year capstone presented at two university symposiums. Seeking full-time junior developer roles.

EDUCATION

B.Sc. in Computer Science & Engineering (Honours) 2022 – 2026
University of Information Technology and Sciences (UITS)

HSC, Birshrestho Munshi Abdur Rouf Public College, Science 2021

SSC, Motijheel Ideal School & College, Science 2019

SKILLS

Languages	JavaScript, TypeScript, Python, HTML, CSS, SQL
Frontend	React.js (Next.js), Chart.js, PWA (web manifest, service worker)
Backend / Real-Time	Node.js, Express.js, Socket.IO, Render
Databases & Platforms	Supabase, PostgreSQL, SQLite
Blockchain	Solidity, ethers.js, Polygon, MetaMask
Tools	Git, GitHub, Vercel

EXPERIENCE

Team Lead — KAIST WFK IT Online Training Program Jul – Aug 2026
Team 5, Batch 1

- Led a 3-person team building the Student Success Portal (Skip Clearance), a PWA with attendance, CGPA, installment and goal-planner tools; personally built the attendance and CGPA calculators and the PWA setup (manifest, service worker, icons).
- Team placed 2nd in the Final Project Competition and won the Excellence Award; delivered the team's live demo presentation solo.

Academic Project Lead — Blockchain-Based Decentralized Voting System 2025 – 2026
Final-year capstone, UITS

- Led a 4-student team, under faculty advisor Dr. Syed Arif Islam, in designing and building a blockchain-based decentralized voting system with Solidity smart contracts.
- Presented as a poster (SISE, Feb 2026) and as a live Capstone Project Demonstration (3rd SISE, May 2026), both at UITS.

PROJECTS

Student Success Portal (Skip Clearance) | *JavaScript, Chart.js, PWA* 2026

- Live student portal (attendance, CGPA, installment, goal planner) built with a 3-person team for KAIST WFK Batch 1 Demo Day; won the Excellence Award. GitHub | Live

Yutnori Online — Real-Time Multiplayer Board Game | *Node.js, Express, Socket.IO* 2026

- Built a real-time online multiplayer version of the Korean board game Yutnori with a room/lobby system, full rule engine, and a solo AI opponent mode.
- Collaborated with a 3-person team and deployed the game live on Render.

Product Provenance & Anti-Counterfeit Tracker | *Solidity, ethers.js, Polygon Amoy* 2026

- Designed and deployed a Solidity smart contract for on-chain product registration and stage-transfer tracking, with a live ethers.js/MetaMask frontend.

AWARDS & ACHIEVEMENTS

Excellence Award (2nd place), WFK IT Online Training Program Final Project Competition — Student Success Portal 2026

Bronze Medal, 7th World Invention Competition and Exhibition (WICE), National Round — Find Blood 2025

Certificate of Participation, UITS Programming Contest — Team "BYte me" 2025
